Virtual Reality (VR) Design and
Production Competition, a pivotal
component of the First International
Skills Competition
Computer Science Olympiad — 1st
Place

AGAJAN SAHATOV

Software Engineer building Full-Stack Web & Mobile Apps
Nanchang, Jiangxi, China

Summary

Software Engineer specializing in full-stack web and mobile application development. Focused on building practical software systems that solve real-world problems. Experienced in building production systems using React, React Native, TypeScript, NextJs, Java Spring Boot, and MySQL.

Previously, I developed the backend, web and mobile platforms for Xcargo, an international logistics company operating between China and Turkmenistan. I built the core applications that allow customers to view shipping prices and track shipments, supporting the company's logistics operations and customer services.

My experience spans frontend engineering, backend API development, database design, and system architecture. I enjoy building reliable systems that solve real-world operational problems.

In addition to engineering, I am fluent in Turkmen, English, Chinese, and Turkish, enabling effective collaboration across international teams.

Experience

Xcargo
Software Engineer
January 2025 - Present (1 year 6 months)
Yiwu, Zhejiang, China

Design and develop the software systems supporting Xcargo's international logistics operations. Built and maintain the company's web platform and mobile application used by customers to view shipping prices and track shipments between China and Turkmenistan. Develop backend services, APIs, and database systems for shipment management, logistics coordination, and operational workflows. Responsible for system architecture, deployment, and performance optimization to ensure reliable logistics operations.

Smart Walnut Technology Company

Front-End Intern

November 2024 - December 2024 (2 months)

Nanchang, Jiangxi, China

Front-End Development Intern working on the project which uses Reactjs

Zhilin Information Technology Co., Ltd. located in Taiyuan

Software Engineer Intern

April 2024 - April 2024 (1 month)

China

As a Software Development Intern at Zhilin Information Technology Co., Ltd. located in Taiyuan, I immersed myself in hands-on learning and project development within the dynamic realm of software engineering. During the Zhilin Internship Training, organized jointly by Taiyuan University of Technology and Zhilin Information Technology Co., Ltd., I gained invaluable experience in crafting innovative solutions in the field of computer science and technology.

Throughout the internship, I collaborated closely with experienced professionals who guided me through the intricacies of software development. From embarking on a comprehensive company tour to honing my skills in Python, Arduino, and deep learning techniques, I actively contributed to the creation of two groundbreaking projects:

1. IoT Smart Home: Leveraging Python and Arduino, I participated in the development of an advanced IoT smart home system. This project not only showcased my proficiency in programming languages but also demonstrated my ability to integrate hardware and software components seamlessly.
2. Udacity Driverless System: Through the application of deep learning principles, I played a pivotal role in the implementation of a cutting-edge driverless system inspired by Udacity's curriculum. By harnessing the power of machine learning algorithms, we engineered a solution that exemplifies the future of autonomous vehicles.

As an Internship Trainee immersed in an enriching learning environment, I embraced every opportunity to expand my knowledge and refine my skills in software development. My tenure at Zhilin Information Technology Co., Ltd. epitomizes my commitment to excellence and my passion for driving technological innovation forward.

太原理工大学 Taiyuan University of Technology

Web Development Intern
June 2023 - July 2023 (2 months)
Taiyuan, Shanxi, China

Participated in a "Practical Production Internship" organized by Taiyuan University of Technology at the university campus, where I gained hands-on experience in software development and production environments. Developed two projects:

- Circle Social Network System: Collaborated with a team to build a social networking platform using PHP, HTML, CSS, JavaScript, and MySQL. Implemented features such as user registration, friend management, messaging, and post/comment functionality.
- Utopia Online Store: Led the development of an online store using Java Spring Boot, MySQL, HTML, CSS, JavaScript, and React library. Demonstrated proficiency in back-end development and modern front-end technologies, contributing to the project's successful completion.

These experiences enhanced my skills in full-stack web development, database integration, and project management, providing valuable insights into real-world software development processes.

太原理工大学 Taiyuan University of Technology
C++ Developer Apprentice
May 2022 - May 2022 (1 month)
Taiyuan, Shanxi, China

Developed the Address Book Management System (ABMS) using C++ programming language and Embarcadero RAD Studio IDE. Demonstrated proficiency in object-oriented programming, software design, and GUI application development. Implemented functionalities for creating, storing, retrieving, updating, and deleting contact details, as well as advanced features such as file storage, keyword search, and data input verification.

Education

Nanchang University
Master's degree, Software Engineering · (September 2024)

太原理工大学 Taiyuan University of Technology
Bachelor's degree, Computer Science and Technology · (September 2020 - July 2024)
