

AGAJAN SAHATOV

FULL-STACK SOFTWARE ENGINEER

Turkmenistan Citizen | Open to Relocation | Visa Sponsorship Required

agajansahatov.com | github.com/agajansahatov | linkedin.com/in/agajansahatov/ | agajansahatovofficial@gmail.com

Professional Full-Stack Software Engineer experienced in building production-ready web, backend, and mobile applications. Skilled in TypeScript, React, React Native, Next.js, Node.js, Express.js, Spring Boot, MySQL, and REST API development. Focused on clean architecture, strong user experience, and shipping reliable products with real-world impact.

SKILLS

- **Frontend:** React, TypeScript, Next.js, React Router, CSS Modules, Tailwind CSS, Bootstrap, Jotai, React Testing Library;
- **Backend:** Java, Spring Boot, REST APIs, Node.js & Express.js, NestJS;
- **Database & ORM:** MySQL, Spring Data JPA, Prisma;
- **Mobile:** React Native, Expo;
- **Tools:** Git, GitHub, Docker, Postman, MySQL Workbench, Adobe Photoshop;
- **Other:** C++, Python, OOP, Data Structures and Algorithms, Design Patterns, Unit Testing.

EXPERIENCE

Full-Stack Developer | Xcargo | www.xcargo.com.tm | Yiwu, Zhejiang, China | Hybrid

May 2025 – May 2026

Built logistics web, backend, and mobile features for tracking, scanning, and pricing with Next.js, React Native, and MySQL.

Front-End Intern | Smart Walnut Technology | Nanchang, Jiangxi, China | On-site

Nov 2024 – Dec 2024

Built component-based user interfaces with TypeScript, React, Jotai, Sass, and Ant Design in an on-site frontend team.

Software Development Internship Trainee | Zhilin Information Technology Co., Ltd. | Taiyuan, Shanxi, China | On-site

Apr 2024

Built IoT Smart Home and UDS projects with Python, Arduino, deep learning, design patterns, and AI simulator logic.

PROJECTS

- **Xcargo** – Full-stack logistics platform with backend, web, and mobile apps using React, Next.js, MySQL, and React Native.
- **Utopia** – Full-stack e-commerce store built using Java, Spring Boot, MySQL, React, Bootstrap, and Axios.
- **Home Guardian** – IoT smart home monitoring system built using Python, Arduino, and PyMata4EX.
- **Udacity Driverless System** – Autonomous driving project with Python, deep learning, sockets, and Udacity Simulator.

EDUCATION

Master's Degree in Software Engineering | Nanchang University | Nanchang, Jiangxi, China

Sep 2024 – Jul 2027

Research direction: Artificial Intelligence and its Applications.

Bachelor's Degree in Computer Science and Technology | Taiyuan University of Technology | Taiyuan, Shanxi, China

Sep 2020 – Jul 2024

Relevant coursework: Programming Languages, OOP, DSA, MySQL, Computer Networks, Web Systems and Technologies.

GPA: 3.92.

LANGUAGES

Turkmen (Native), English (Fluent, TOEFL), Mandarin Chinese (Fluent, HSK 5), Turkish (Fluent), Russian (Beginner).
